USB Data

Built in USB Data Logger.
Data can be traced and exported.

Single LED Display

High accuracy single
LED displays.

Temperature Control

High Precision
Temperature Control.

Security System.

Excellent alarm system that is equipped with a number of alarm functions including:

- High/low Temperature Alarm
- Door Ajar Alarm
- Power Failure Alarm
- Sensor Failure Alarm

Energy Saving and Environmentally Friendly.

This unit boasts a variable frequency compressor with an optimized cooling system which is proven to be energy saving. This type of compressor, along with the refrigerant are fluorine and chlorine free, making them better for the environment.

Microcomputer Temperature Control.

A high precision microcomputer temperature control system with built-in control and alarm sensors allows user to have the utmost control of their unit and ensure products are kept at the best temperature possible. The unit is also equipped with an easy to use LED controller.

Heated Door.

Equipped with a heated door, this refrigerator is perfect for product storage in warmer environments as there is no condensation on the outside of the unit.
